

### eLearning Motivation Across University and Rural Young Adults in Winnovators Space

Our study was conducted in the frames of KA2 Erasmus+ project WINnovators (2021-2024).

M. Zapušek, K. Pata, K. Jüristo, V. Devedzić, S. D. Radenkovic, M. Devedzić, D. Milošević, M. Blagojević, S. Popović-Pantić

### Introduction

### The aim of the **project Winnovators**

- Higher education (HEI) envisioned as sustainable education hubs.
- Collaboration between students and young women from vulnerable groups to foster STEAM, sustainability and entrepreneurship competencies for everyone involved.

### The goals of this **study**

- **Evaluation** of the *effectiveness* of gamification elements integrated within the Winnovators space to *enhance motivation* and *engagement* in capacity building activities.
- **Determine** how these elements and approaches contributed to enhancing the learning experience in a cross university-community collaborative educational setting.

## Gamicication elements

- Winnovators online learning platform
- Open Badges
- Winnovators competency framework (5 areas)
  - Learning to be
  - Learning to value
  - Learning to live and work together
  - Learning to understand and apply
  - Learning to empower
- 1 badge = 1 competence
- Participants can award badges to themselves and/or to others
- Open leaderboards
- Dashboard for displaying badges

**WINNOVATORS** 

Boosting entrepreneurial and STEAM capacity

# Methodology

- Sample = 35 participants from Estonia, Serbia and Slovenia
- Data collected using online survey
- Qualitative and quantitative questions to ensure balanced data collection • Likert scale (from 1 - strongly disagree to 5 - strongly agree)
  - Open-ended questions to get detailed opinions
- The survey questions included:
  - General opinions on the use of badges to assess participants' overall attitudes towards badges
  - Motivational aspects to explore how badges influence engagement, collaboration, and learning
  - The process of awarding badges to self and others, emphasizing peer and self-assessment
  - Views on the use of leaderboards to track progress
  - The usefulness of reviewing all badges earned
- Ethical considerations
  - Informed consent
  - Right to withdraw from survey at any point

# Demographics

- Country distribution: Estonia 6 (17%), Serbia 11 (31%), and Slovenia 18 (51%).
- Gender distribution: 85% women, 15% men, no 'other' selected, reflecting the program's focus but offering insights into gender diversity engagement among university participants.
- Residence varied: 29% from large cities, 17% suburbs/outskirts, 31% small towns, 17% villages, 6% countryside, highlighting diverse access to resources and opportunities.
- Age range: Majority 23-24 years (34%), followed by varied age groups, indicating the program's appeal across different life and career stages.
- Roles: 62% Change Agents (university students), 38% Winnovators (young women from vulnerable groups), showing the participation dynamics.

**WINNOVATORS** 

Boosting entrepreneurial and STEAM capacity

# Results of the study

### **General Views on the use of badges**

#### Data

| Statement  | Responses |      |         | Chá  | ange Ag | jents   | Winnovators |      |         |
|--|-----------|------|---------|------|---------|---------|-------------|------|---------|
|  | avg       | med  | std dev | avg  | med     | std dev | avg         | med  | std dev |
| I like being rewarded with<br>badges for completing a<br>general activity/challenge.                     | 4,11      | 4,00 | 0,83    | 4,14 | 4,00    | 0,79    | 4,07        | 4,00 | 0,92    |
| I like that the badges reflect the competences.  | 4,31      | 4,00 | 0,72    | 4,33 | 4,00    | 0,66    | 4,29        | 4,50 | 0,83    |
| The type of the badge helps<br>me recognize my strengths and<br>the strengths of my co-<br>participants. | 4,23      | 4,00 | 0,88    | 4,14 | 4,00    | 0,91    | 4,36        | 5,00 | 0,84    |

#### Analysis

- Both Change Agents and Winnovators value badge rewards for achievements, highlighting its motivational effectiveness.
- Badges are positively viewed as competency indicators, with Winnovators showing a slightly higher preference.
- Both groups appreciate badges for recognizing personal and peer strengths, indicating a shared appreciation for the gamification system despite some diversity in opinions.
- Suggestions for improving the badge system include simplification, reducing frequency to prevent overload, and enhancing technical management for easier assignment.
- Participants desire broader recognition of achievements, suggesting a need for a balance between motivational impact and usability in the badge system.

### The motivational and engagement aspects of badges

#### Data

| Statement  | Responses |      |         | Cha  | ange Ag | gents   | Winnovators |      |        |
|--|-----------|------|---------|------|---------|---------|-------------|------|--------|
|  | avg       | med  | std dev | avg  | med     | std dev | avg         | med  | std de |
| Earning badges has increased my desire to learn.             | 3,23      | 3,00 | 1,14    | 3,29 | 3,00    | 1,10    | 3,14        | 3,00 | 1,23   |
| The badges made me want to<br>participate in the activities. | 3,20      | 3,00 | 1,13    | 3,24 | 3,00    | 1,09    | 3,14        | 3,00 | 1,23   |

### Analysis

- Badges moderately improved learning desire and activity participation among participants.
- The impact of badges was positive but not overwhelmingly significant.
- Diverse responses from the Winnovators group indicate a need for tailored badge strategies.

### Awarding badges to others

#### Data

| Statement  | Responses |      |         | Change Agents |      |         | Winnovators |      |         |  |
|--|-----------|------|---------|---------------|------|---------|-------------|------|---------|--|
|  | avg       | med  | std dev | avg           | med  | std dev | avg         | med  | std dev |  |
| I like the possibility of awarding a badge to other participants.                  | 4,03      | 4,00 | 0,98    | 4,19          | 4,00 | 0,81    | 3,79        | 4,00 | 1,19    |  |
| Giving a badge to another<br>participant improved our<br>cooperation/relationship. | 3,26      | 3,00 | 0,98    | 3,05          | 3,00 | 0,92    | 3,57        | 3,00 | 1,02    |  |

#### Analysis

**Results** 

- Participants, especially Change Agents, favor awarding badges to peers, though its impact on collaboration and relationships is moderately positive.
- The Winnovators group exhibited more diverse reactions, suggesting the need for personalized badge practices.
- Feedback calls for a more user-friendly system, including simplified badge awarding and clearer badge names, alongside addressing technical issues to enhance the feature's usability.

### Awarding badges to oneself

#### Data

| Statement   | Responses |      |         | Cha  | ange Ag | jents   | Winnovators |      |         |  |
|---|-----------|------|---------|------|---------|---------|-------------|------|---------|--|
|   | avg       | med  | std dev | avg  | med     | std dev | avg         | med  | std dev |  |
| I like being able to award a badge to myself.   | 3,29      | 3,00 | 1,18    | 3,00 | 3,00    | 1,18    | 3,71        | 4,00 | 1,07    |  |
| Giving myself a badge has<br>helped me think about myself<br>and thereby recognize my<br>strengths. | 3,29      | 3,00 | 1,02    | 3,10 | 3,00    | 1,00    | 3,57        | 3,50 | 1,02    |  |
| Awarding a badge to myself<br>has had a positive impact on<br>my future work and learning.          | 3,17      | 3,00 | 1,01    | 2,95 | 3,00    | 0,97    | 3,5         | 3,00 | 1,02    |  |

#### Analysis

- Low enthusiasm for self-awarding badges among participants.
- High variability in responses indicates diverse opinions.
- Unfamiliarity with self-recognition and self-praise.
- Psychological barriers such as self-criticism and modesty are significant.
- Participants call for clear guidelines to ensure objectivity in self-awarding.

### Leaderboards

#### Data

| Statement   | Responses |      |         | Ch   | ange Ag | gents   | Winnovators |      |         |  |
|---|-----------|------|---------|------|---------|---------|-------------|------|---------|--|
|   | avg       | med  | std dev | avg  | med     | std dev | avg         | med  | std dev |  |
| I have no problem with my score being visible to others on the leaderboard.                         | 4,11      | 4,00 | 0,99    | 4,48 | 5,00    | 0,68    | 3,57        | 3,50 | 1,16    |  |
| Comparing myself to others on<br>the leaderboard encouraged<br>me to work and learn even<br>harder. | 3,43      | 4,00 | 1,17    | 3,48 | 4,00    | 1,08    | 3,36        | 3,50 | 1,34    |  |
| Leaderboard score influenced<br>my cooperation and<br>relationships with other<br>participants.     | 2,89      | 3,00 | 1,13    | 2,9  | 3,00    | 1,14    | 2,86        | 3,00 | 1,17    |  |

### Analysis

- Participants, especially university students, are generally comfortable with public leaderboards.
- Leaderboards have a modest positive effect on motivation.
- High variability in responses suggests diverse individual experiences with leaderboards.
- Leaderboards do not significantly influence collaboration or relationships among participants.

Results

### **Badge View**

#### Data

| Statement  | Responses |      |         | Cha  | ange Ag | gents   | Winnovators |      |         |
|--|-----------|------|---------|------|---------|---------|-------------|------|---------|
|  | avg       | med  | std dev | avg  | med     | std dev | avg         | med  | std dev |
| I like the badge overview.   | 3,83      | 4,00 | 1,07    | 3,90 | 4,00    | 0,94    | 3,71        | 4,00 | 1,27    |
| The badge overview provides a<br>clear overview of the acquired<br>badges. | 4,06      | 4,00 | 0,87    | 4,19 | 4,00    | 0,87    | 3,86        | 4,00 | 0,86    |
| The badge overview helped me<br>identify the areas I need to<br>work on.   | 3,97      | 4,00 | 0,79    | 4,00 | 4,00    | 0,77    | 3,93        | 4,00 | 0,83    |

#### Analysis

Results

- Both groups generally like the badge overview, but enthusiasm varies.
- Winnovators show a wider range of opinions on badge effectiveness.
- Badge overviews are seen as clearer in showing competencies than individual badges.
- Both groups value badge overviews for identifying areas for improvement.

### Conclusions

- Gamification elements in the Winnovators project were well received overall. • Badges effectively reflected competencies but were less effective as motivational
- tools.
- Awarding badges to others was appreciated but didn't significantly enhance collaboration.
- Technical challenges and complexity were noted in the badge awarding system. • Self-awarding badges faced skepticism due to unclear criteria and unfamiliarity. • Despite potential concerns, leaderboards were accepted without negatively
- impacting motivation.
- The badge overview was valued for tracking progress and identifying learning needs.
